

PRESS RELEASE

Verona, 30th September 2002

CAD IT: THE BOARD APPROVES THE HALF YEAR 2002 RESULTS

CAD IT closes the first semester of 2002 with a production value of 30 million Euro, 3% more than the first semester of 2001

Late this afternoon the Board of Directors of CAD IT SpA, leader in the Italian financial software market, approved the consolidated six-monthly report of the CAD IT Group.

On **30th June 2002** CAD IT reported the following consolidated six-monthly data:

- a **production value** of 30 million Euro, an increase of 3% compared to the first semester of 2001;
- an **EBITDA** of 6.3 million Euro, corresponding to 21% of the production value;
- an **EBIT** of 4.6 million Euro, corresponding to 15.2% of the production value;
- a **net profit** of 2.6 million Euro, corresponding to 8.6% of the production value.

During the first semester of 2002 the Group has continued its policy of increasing investment in research and development activities in order to enrich the range of products on offer. In particular, the investments in R&D, mainly due to staff costs, were completely financed from the budget for that period. Moreover, more new products are on offer thanks to the acquisition of two small companies; Bit Groove, which produces Babele, a *software for business intelligence*, and Elidata, which developed the Caronte *software* for linking banks and brokers to domestic and foreign financial markets.

The Group's staff, 640 people at the end of June, has increased by 40 members (+6.7%) since the beginning of the year.

CAD IT further reports that the **consolidated net financial position** at 30th June 2002 was 35.4 million Euro. During the semester the group purchased stakes and invested in technical assets for about 4.2 million Euro and paid dividends for 5.8 million Euro. The investments and the acquisition of stakes were partially compensated by a positive monetary flow from operating activities of about 4.5 million Euro.

The President of CAD IT, Giuseppe Dal Cortivo, said: "In the first semester of 2002 the Group's profits have grown by only 3%: the slackening in the economy has in fact induced Italian banks to defer decisions on investment in instrumental assets. In this conjunctural phase we are of the

opinion that maintaining large investments in research and development is of strategic importance. We are indeed convinced that our new products will allow us to meet the greater demand which we expect for the present semester and in 2003”.

The CAD IT Group

The CAD IT Group has developed and distributed information systems for the banking sector and small and medium sized companies for over 20 years. CAD IT's offers include standard and personalized applicative packages, software maintenance, updating, consultancy and training.

CAD IT is leader in the Italian software market for the banking sector with its main product, Financial Area, a programme which completely manages all functions connected to negotiation, settlement and administration of security transactions, debentures, derivatives (in any currency) and adopted by 57% of Italian banking outlets.

In addition, the Group boasts a long-standing activity in the industrial sector and the capacity to offer solutions for e-business, credit and industrial companies in constant evolution.
